

How to enable SSL for SMTP in iPhone / iPad

Outgoing mail only

Select **Settings**

Select **Mail, Contacts, Calendars**

Select the account you wish to update.

Scroll down to the *Outgoing Mail Server* section and click **SMTP**.

Click on the server **smtp.reg365.net**.

Set *Use SSL* to On and the *Server Port* to 25.

Click on *Authentication* and select **Password**.

The changes should now be complete.
