

# How to enable SSL in Outlook 2007

## Enabling SSL for POP3 connections

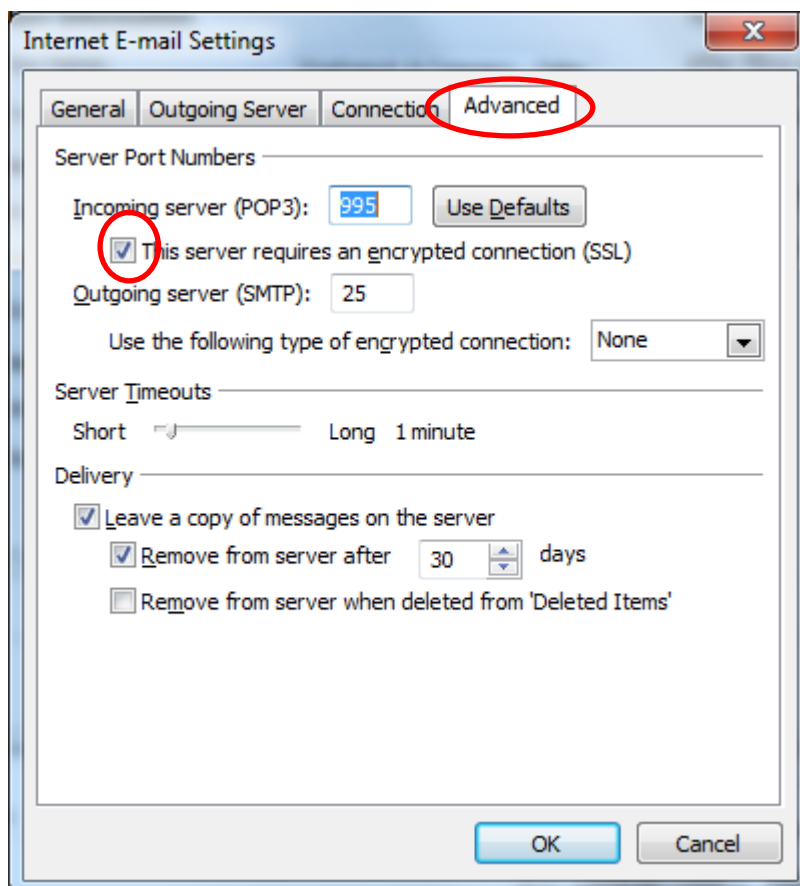

Please note you will need to update the incoming mail server in your mail client to 'pop3.reg365.net'.

- Open Outlook 2007 and click on **Tools** and then **Account Settings...**

-Click on the account you wish to modify and then click on the **Change** button

-Click on **More Settings**

- Select the **Advanced** tab. In the section **Incoming Server**, tick the box **This server requires an encrypted connection (SSL)**. This should change the port number to 995. Click **OK**

# How to enable SSL in Outlook 2007

## Enabling SSL for IMAP connections

Please note you will need to update the incoming mail server in your mail client to 'imap.reg365.net'.

- Open Outlook 2007 and click on **Tools** and then **Account Settings...**

-Click on the account you wish to modify and then click on the **Change** button

-Click on **More Settings**

- Select the **Advanced** tab. In the section **Incoming Server**, select **SSL** from the drop down menu. This should change the port number to 993. Click **OK**
